

Second Announcement

1st World Congress on Ga-68 and
Peptide Receptor Radionuclide Therapy (PRRNT)

**THERANOSTICS – On the Way to
Personalized Medicine**

June 23 - 26, 2011

**Congress Venue
Zentralklinik Bad Berka
Germany**

www.1stWorldCongress-Ga-68.de

REGISTER NOW!

Early Bird Registration April 29, 2011
Late Registration June 16, 2011

Post-Congress: June 27 - 29, 2011

**Training School on
PET Radionuclide Generators ^{68}Ge / ^{68}Ga and ^{44}Ti / ^{44}Sc**

**Institute of Nuclear Chemistry
Johannes Gutenberg University Mainz**

Letter of Invitation

Dear Colleague:

We would like to invite you to participate in the 1st World Congress on Gallium-68 and Peptide Receptor Radionuclide Therapy (PRRNT) which will take place June 23-26, 2011 in Bad Berka, Germany. This Congress, co-organized by the Department of Nuclear Medicine/PET/CT Center, Zentralklinik Bad Berka and the Institute of Nuclear Chemistry, Johannes Gutenberg University, Mainz is targeted to all chemists, physicians, and investigators with interest in generators, PET radiochemistry, molecular imaging and radionuclide therapy.

Attendance should be particularly useful to those who are new in the field or are interested in broadening their understanding of the rapidly developing research and clinical applications of Ga-68 and other generator-produced PET radioisotopes, new PET radiopharmaceuticals as well as PRRNT.

The congress aims at both - to educate and to offer a unique forum for high level scientific discussions on the recent developments in the exciting field of THERANOSTICS.

We expect outstanding speakers from all over the world who certainly will give fascinating insights in their research and clinical work, thus creating new ideas and concepts on the way to personalized medicine.

A number of companies have already accepted our invitation to participate in the Industry Exhibition which will present the latest technological developments in generator technology and Ga-68 modules, devices and labeling strategies.

In addition, the congress offers the opportunity for a "Hands-on Training Course" on $^{68}\text{Ge}/^{68}\text{Ga}$ generators and for learning the practical principles of ^{68}Ga labeling procedures. This course is organized (for a limited number of participants) on June 27-29, 2011 at the Institute of Nuclear Chemistry, Johannes Gutenberg University, Mainz, Germany.

Aside from the congress activities you have the opportunity to explore Weimar, the city of Goethe and Schiller, and the European Capital of Culture in 1999. Exchange ideas and have interactions with colleagues from around the world - and make new friends!

We are looking forward to meet you in Bad Berka and we hope and expect that you will have an unforgettable stay!

Sincerely,

Prof. Dr. med. Richard P. Baum

Prof. Dr. sc. nat. Frank Rösch
